SOCIAL PROCUREMENT

Our Commitment

GLC is committed to procuring goods and services in an efficient, ethical, and sustainable manner.

Our Approach

GLC acknowledges that sustainable procurement enables long term financial resilience while minimising impacts on the community and environment. To maximise value for our customers, stakeholders, and the communities in which we operate, we will:

- Uphold ethical practices, comply with the Modern Slavery Act (2018), and consider human rights and labour practices in alignment with ISO 20400: Sustainable Procurement Guidelines.
- Source sustainably and ethically, whilst preferencing:
  - Local suppliers – within the Local Government Area/s
  - Regional suppliers
  - Australian suppliers
  - Aboriginal and Torres Strait Islander suppliers and Social Enterprises
- Ensure all procurement decisions consider environmental, social, and economic aspects (min. 20%) through non-cost multi-criteria analysis including:
  - Health, Safety, Environment, Quality and Sustainability performance
  - Assessment and mitigation of Modern Slavery risks in accordance with the Gamuda Australia Modern Slavery Policy.
  - Past Performance, Legacy and Reputation
  - Aboriginal and Torres Strait Islander participation
- Require suppliers and subcontractors, within their own supply chains, to:
  - Maximise local content.
  - Engage Aboriginal and Torres Strait Islander peoples and businesses.
  - Investigate opportunities to reduce resource consumption (including the feasibility of renewables), minimise waste or divert from landfill, and reduce the embodied carbon of high materiality construction materials such as concrete, steel and asphalt.
- Stimulate innovation through procurement to enhance whole-of-life environmental, social, and economic outcomes and reward exemplary performance within our supply chain.
