#### CONSTRUCTION PARKING AND ACCESS STRATEGY - WESTMEAD SITE OPERATIONS SYDNEY METRO WEST - WESTERN TUNNELLING PACKAGE

#### 1 EXECUTIVE SUMMARY

Parking accumulation surveys were undertaken in February 2022 in the Westmead area. The surveys were undertaken every hour between the hours of 7AM through to 5PM daily, covering the required times as nominated in the Ministerial Condition of Approval D91, these being peak hours, off peak hours, school drop off and pick up times, weekend periods and during special events. It should be noted that there were no special events and that there does not seem to be any special events in the area that would impact parking.

The surveys undertaken confirmed that there are 728 unrestricted spaces available within the survey area and a total of 914 timed resident parking spaces The average weekday occupancy for the unrestricted spaces showed that 405 spaces were available for use and that the maximum occupancy still provided for 361 spaces available. For the resident parking the average weekday occupancy showed that on average there were 545 spaces available and that when the maximum occupancy was used there were still 447 spaces available.

The parking surveys for the unrestricted parking areas during weekdays show significant occupation rates closer to the Westmead medical area, Westmead rail station and the shopping centre on Hawkesbury Road. The outcome was similar to the survey results of the timed parking associated with resident parking schemes during the week with the highest occupancy rate near the Westmead medical area. South of the rail line, the timed parking became less occupied.

For the weekend, the occupancy for both unrestricted and timed resident parking was the same as for the weekday.

During the local area works for the site operations phase of works, a total of twelve (12) parking spaces will be removed, all of which are timed resident parking spaces. However, GLC will remove the existing driveways on Bailey Street and Hawkesbury Road which are no longer required due to the demolition works (undertaken by others) and reinstate the kerb lines to provide eight (8) spaces in total. Thus, the total number of spaces to be removed is four (4).

In summary, the available parking stock in the surrounding road network, can adequately cater for the permanent loss of parking associated with the local area works and site operations phase of works.

It should be noted that the survey results reported in this document do not take into account parking that is not either unrestricted or resident parking time limited, hence the difference between the appendix A results reported by Austraffic and those numbers included in this report.

#### 2 Introduction

#### 2.1 Context

This Construction Parking and Access Strategy (CPAS or Strategy) has been developed for the delivery of the Western Tunnelling Package. It will be delivered by Gamuda Australia Laing O'Rourke Consortium (GLC). Sydney Metro West – Westmead to The Bays Concept and Stage 1 received planning approval on 11 March 2021 (SSI 10038). The Project comprises the WTP, which is the western portion of Stage 1 of SSI 10038, from Sydney Olympic Park to Westmead. This CPAS has been prepared to address requirements of the Minister's Conditions of Approval (MCoA) and any modifications to the MCoA, Revised Environmental Management Measures (REMMs) listed in the Sydney Metro West – submissions report, dated 20 November 2020, the Construction Traffic Management Framework (CTMF) requirements and all applicable legislation as they relate to the Project.

#### 2.2 Project scope

Sydney Metro West (SMW) is a new underground railway connecting Greater Parramatta and the Sydney CBD. It will provide fast connections between greater Sydney's two major business centres as well as providing better access to the growing business and entertainment precincts in Olympic Park and Pyrmont, the health and medical research hub at Westmead and the future business and tourism site at The Bays.

SMW is being delivered in a number of packages. The Western Tunnelling Package (WTP) is one package for SMW. It involves 9km of twin railway tunnels between Sydney Olympic Park and Westmead as well as:

- Westmead Station box excavation, including temporary support, stub tunnels, partially mined station cavern and crossover cavern including permanent lining and support
- Parramatta Station, including excavation of station box and associated support
- Clyde Maintenance and Stabling Facility (MSF), including permanent dive structure, portal, spur running tunnels, spur tunnel junction cavern, bulk earthworks, civil structures, utilities corridor, road crossing and creek diversion
- Rosehill Services Facility, including shaft excavation, permanent lining and lateral support
- a precast segment manufacturing facility at Eastern Creek
- demolition and site clearance works
- Tunnelling between Sydney Olympic Park (SOP) and Westmead. Tunnelling will be undertaken
  by placing the tunnel boring machines (TBMs) at the Rosehill Services Facility box and
  retrieved out at the SOP Station Box and then placed back at the Rosehill Services Facility and
  retrieved at the Westmead Station Box.
- No surface works are proposed at SOP except for the retrieval of the TBM.

The entire Sydney Metro West Stage 1 is shown on Figure 2-1.

Figure 2-1: Project location

## 2.3 Scope of the Strategy

The scope of this strategy is to describe how Gamuda Laing O'Rourke consortium (GLC) will identify and mitigate impacts resulting from off and on street parking changes during construction. The scope of this Strategy is prescribed by the Ministerial Conditions of Approval, specifically MCoA D91 and applies to the construction sites of Westmead for the site operations phase of works. Separate strategies have been provided for the Parramatta and Clyde sites.

# 2.4 Purpose

The purpose of this Strategy is to identify and mitigate impacts resulting from on- and off-street parking changes during construction.

#### 2.5 Objectives

The objectives of this Strategy are to:

- Determine the existing on and off street parking capacity in the area surrounding the Westmead construction site
- Identify on and off street parking required to be removed as part of the local area works for the site operations phase of the Project
- Identify the demand for workforce parking and how this demand could be met to minimise impacts to the surrounding community
- Outline measures to reduce the demand for workforce parking by encouraging the uptake of public transport, carpooling and active transport and
- Describe how monitoring and corrective actions would be implemented to assess the effectiveness of management measures

#### 2.6 Review and distribution

This Strategy will be provided to Cumberland Council for review and will be submitted to the Planning Secretary for approval one month prior to the commencement of any works associated with the site operations phase impacting existing parking stock. A copy of this CPAS strategy will be included as an appendix in the relevant CTMP's.

#### 2.6.1 Update and amendment of this Strategy

Any revisions to this Strategy will be in accordance with process outlined within the CEMP. A copy of the updated Strategy will be distributed to relevant stakeholders in accordance with the approved document control procedure. The ER does not endorse the CPAS or any minor amendments to the CPAS.

# 3 REQUIREMENTS

# **3.1** Minister's Conditions of Approval

The Minister's Condition of Approval (MCoA) relevant to this Strategy are listed in Table 3-1.

Table 3-1: Minister's Condition of Approval

MCoA#	Requirement	Where addressed
D90	Vehicles associated with the project workforce (including light vehicles and Heavy Vehicles) must be managed to:	Section 7.3
	a) Minimise parking on public roads	Section 8
	ay williming on public roads	Section 9.7
	b) Minimise idling and queuing on public roads	Section 10.1
	c) Not carry out marshalling of construction vehicles near sensitive land user(s)	Section 10.1
	d) Not block or disrupt access across pedestrian or shared user paths at any time unless alternative access is provided and	Section 7.3
	e) Ensure spoil haulage vehicles adhere to the nominated haulage routes identified in the CTMP	Section 10.2
D91	A Construction Parking and Access Strategy must be prepared to identify and mitigate impacts resulting from on and off street parking changes during construction. The Construction Parking and Access Strategy must include, but not necessarily limited to:	This Strategy
	a) Achieving the requirements of Condition D90 above	
	b) Confirmation and timing of the removal of on and off street parking associated with construction of Stage 1 of the CSSI	Section 7.2 and
	c) Parking surveys of all parking spaces to be removed or occupied by the project workforce to determine current demand during peak, off peak, school drop off and pick up, weekend periods and during special events	Appendix A
	d) Consultation with affected stakeholders utilising existing on	Section 12
	and off street parking stock which will be impacted as a result of construction	Appendix B
	e) Assessment of the impacts to on and off street parking stock taking into consideration occupation by the project	Appendix A
	workforce, outcomes of consultation with affected stakeholders and considering the impacts of special events	Sections 6.2 and 7

MCoA#	Requirement	Where addressed
	f) Identification of reasonable and practicable mitigation measures to manage impacts to stakeholders as a result of on and off street parking changes including but not necessarily limited to, staged removal and replacement of parking, provision of alternative parking arrangements, managed staff parking arrangements and working with relevant council(s) to introduce parking restrictions adjacent to work sites and compounds or appropriate residential parking schemes	Section 9
D91	g) Where residential parking schemes already exist, off road parking facilities must be provided for the project workforce	Section 6.1 Section 9.7
	h) Mechanisms for monitoring, over appropriate intervals (not less than 6 months) to determine the effectiveness of implemented mitigation measures	Section 11
	i) Details of shuttle bus service(s) to transport the project workforce to construction sites from public transport hubs and off site car parking facilities (where these are provided) and between construction sites	Section 9.7
	<ul> <li>j) Provision of contingency measures should the results of mitigation or monitoring indicate implemented measures are ineffective and</li> </ul>	Section 11.3
	k) Provision of reporting or monitoring results to the Planning Secretary and Relevant Council(s) at six (6) monthly intervals	Section 11.2
D92	The Construction Parking and Access Strategy must be submitted to the Planning Secretary for approval at least one (1) month before the commencement of any construction that reduces the availability of existing parking. The approved Construction Parking and Access Strategy must be implemented before impacting on on-street parking and incorporated in the CTMP	Section 2.6
D93	During construction, all reasonably practicable measures must be implemented to maintain pedestrian, cyclists and vehicular access to, and parking in the vicinity of, businesses and affected properties. Disruptions are to be avoided and where avoidance is not possible, minimised. Where disruption cannot be minimised, alternative pedestrian, cyclists and vehicular access and parking arrangements must be developed in consultation with affected business and implemented before the disruption.	Section 7.3

MCoA#	Requirement	Where addressed
	Adequate signage and directions to businesses, must be provided before, and for the duration of any disruption.	

# 3.2 Revised Environmental Management Measures

The Revised Environmental Management Measures (REMMs) relevant to this Strategy are listed in Table 3-2.

Table 3-2: Revised Environmental Management Measures

REMM#	Impact/ Issue	Mitigation Measure	Where addressed
TT3	Emergency vehicles access	Access to properties for emergency vehicles would be provided at all times	Section 7.3.1
TT10	Loss of parking	Where existing parking is removed to facilitate construction activities, consultation would occur with the relevant local council to investigate opportunities to provide alternative parking facilities	Section 7.3
TT11	Loss of parking	Construction sites would be managed to minimise the number of construction workers parking on surrounding streets by:  • Encouraging workers to use public or active transport  • Encouraging ride sharing  • Provision of alternative parking locations and shuttle bus transfers where feasible and reasonable	Sections 9.6 and 9.7

### **4 PROJECT WORKS**

#### 4.1 Local area works

The local area works required at the Westmead site include:

Removal of the roundabout and splitter islands and installation of traffic signal hardware at the intersection of Hassall Street and Bailey Street, as noted on Figure 4-1. Post the roundabout removal, the traffic signals will be commissioned. Traffic Signal Control designs go through a separate TfNSW TCS design approval process which can prolong the approval process. Works cannot commence until the TCS has been approved.

Figure 4-1: Roundabout and splitter islands to be removed

Traffic will be stopped using portable traffic signals on each approach to the intersection. Pedestrians will be diverted away from the work area. A typical example of the traffic control to be implemented for both the removal and installation works is provided on Figure 4-2.

Figure 4-2: Typical traffic control for splitter island removal

Removal of parking on the western side (2 spaces to facilitate the driveway into site) of Hassall Street between Bailey Street and Alexandra Avenue, refer to Figure 4-3.

Figure 4-3: Dedicated right turn into site and new driveway entry

The installation of signposting of the associated No Stopping on the eastern side of Hassall Street between Bailey Street and Alexandra Avenue to facilitate the operation of the right turn bay into site and a separate through lane for public traffic, will be undertaken at least two business days prior to operation of the new driveway. The No Stopping will remove 5 spaces on the eastern side, as noted on Figure 4-4

Figure 4-4: Parking removal in red on Hassall Street

The driveway works will be undertaken at night under a portable traffic signal arrangement as shown on Figure 4-5.

Figure 4-5: Portable traffic signal arrangements for the driveway construction

Further minor works are also required remote from the main construction site in both Westmead and Parramatta including the widening of the signalised pedestrian crossings at the intersection of Priddle Street and Hawkesbury Road and changes to pedestrian fencing at the intersections of Priddle Street and Hawkesbury Road and Great Western Highway and Pitt Street. It should be noted that these minor works do not include either the temporary or permanent removal of parking.

To increase the available parking stock and where the demolition works have removed existing buildings, the existing driveways into previous premises, refer to Figure 4-6, are proposed to be removed along Bailey Street and Hawkesbury Road. These works will be undertaken on Bailey Street during standard working hours and outside of standard working hours on Hawkesbury Road.

Figure 4-6: Driveway reinstatement

These works will be undertaken using short term traffic control including a parking lane closure on Bailey Street, refer to Figure 4-7 and kerb side lane closure on Hawkesbury Road, refer to Figure 4-8.

Figure 4-7: Parking lane closure on Bailey Street

Figure 4-8: Hawkesbury Road kerb side lane closure

#### 4.1.1 Indicative timing of local area works

The works are planned to be staged to minimise impact on the surrounding road and path networks and to ensure that the parking removal is also staged. The indicative durations and timings are as noted in Table 4-1.

Table 4-1: Indicative durations and timings of local area works

Location	Works	Indicative durations	Indicative timing
Hassell Street and Bailey Street intersection	Roundabout removal including splitter islands and kerb extensions/ Traffic signal installation	4-8 weeks	TCS design needs to go through TfNSW TCS design approvals. Works proposed to commence towards the end of 2023 start of 2024.
Hassall Street	Driveway works	1 week	Completed driveway works.

#### 4.2 Site operations

There are no requirements for any further parking occupation for the main works as these will also be located within the site. The removal of the Tunnel Boring Machine from this site, will be the subject of a separate CPAS.

#### 4.3 Locality

The site is located south of the health precinct in Westmead and is bounded by Hawkesbury Road to the west, Bailey Street to the south, Hassall Street to the east and Alexandra Avenue to the north, as shown on Figure 4-9.

Figure 4-9: Site locality

## 5 PARKING SURVEY METHODOLOGY

Parking accumulation surveys in accordance with D91(c), consistent with AustRoads, were undertaken between Thursday 17<sup>th</sup> Feb 2022 through to Wednesday 23<sup>rd</sup> Feb 2022\_inclusive. The weekdays surveys were undertaken during the AM and PM peaks, School drop off and pick up times and interpeak. Weekend surveys were undertaken hourly between the hours of 7AM and 6PM Saturdays and Sundays. No special events were identified in the local area.

#### 5.1 Survey locations

Surveys were conducted in the Westmead area as noted in Table 5-1.

Table 5-1: Survey locations

#### 5.2 Calculating parking occupancy

Parking occupancy is defined as the ratio of number of occupied spaces to the total number of spaces available. To determine the number of spaces available, the number of available parking spaces was counted and all parking controls/ restrictions (ie: unrestricted, timed, disabled parking, loading zones etc) were recorded. To determine the number of occupied spaces, the number of parked vehicles in each street were recorded over a defined survey period.

Parking occupancy (%)= <u>number of parked cars</u>

Number of parking spaces

### **6 WESTMEAD**

### 6.1 Existing conditions

The existing parking restrictions have been identified and area detailed within Table 6-1 and depicted on Figure 6-1. It is noted that residential parking schemes exist within the Westmead area.

Table 6-1: Existing parking restrictions

Location	Restrictions	# of time restricted spaces available	# of unrestricted spaces available
Hawkesbury Road	Mix of Resident Parking, timed parking and unrestricted	30	39
Darcy Road	No Stopping, No Parking and bus zones	0	0
Caroline Street	Mix of Resident Parking, car share parking and unrestricted	29	30
Park Avenue	Mix of Resident Parking, car share parking and unrestricted	27	68

Figure 6-3: Average weekday occupancy of resident parking

#### 6.2.2 Weekend

The parking surveys for the unrestricted parking areas during weekdays show significant occupation rates closer to the Westmead medical area, Westmead rail station and the shopping centre on Hawkesbury Road. A precis of the results of these surveys can be found below within Table 6-4 and as depicted on Figure 6-4.

Table 6-4: Average and maximum weekend occupancy unrestricted spaces

Figure 6-5: Average weekend occupancy

## 6.2.3 Special event

No special events were known around or near the construction site.

## **7 CONSTRUCTION IMPACTS**

### 7.1 Existing parking to be removed

Four (4) parking spaces in total will be removed for the local area works. Seven (7) spaces will be removed from Hassall Street between Bailey Street and Alexandra Avenue— five (5) on the eastern side and two (2) on the western side. On Hawkesbury Road four (4) spaces will be removed. However, GLC will reinstate driveways that are redundant on both Hawkesbury Road and Bailey Street to compensate for the loss of parking. This parking removal and proposed offset is shown on Figure 7-1.

Figure 7-1: Parking removal and offset parking associated with the LAW and site operations

There will also be temporary parking spaces occupation during short term traffic control and works. These latter impacts will be removed at the end of each day post the completion of works at the nominated locations.

## 7.2 Staged temporary removal of parking

#### 7.2.1 Local area works

The local area works temporary traffic control will on average be in place for one (1) shift at each location over multiple days. The proposed start of the works is November 2022 with most works being completed within three months of the commencement, subject to approvals. The works at the intersection of Bailey Street and Hassall Street including roundabout decommissioning and signal hardware installation will occur over a number of weeks, typically at night or weekends, the parking removal southbound on Hassall St will be in November and be permanent for the operation of the traffic signals. Where possible GLC will apply for daytime works for noisy works during off peak periods. The works are proposed along Hassall Street between Alexandra Avenue and Bailey Street, Bailey Street at the intersection with Hassall Street and Hawkesbury Road between Alexandra Avenue and Bailey Street to complete the new signal installation. The number of permanent parking spaces to be removed are as noted in section 7.1. Temporary removal of parking will occur along Bailey Street during kerb restoration works. These works will be undertaken during the day in November 2022 for approximately 10 shifts. Kerb restoration works and driveway installation on Hawkesbury Road are proposed to be undertaken outside of peak periods and will likely need to be undertaken at night. The number of parking spaces occupied at any one time will be no greater than four (4) spaces on Bailey Street and seven (7) on Hawkesbury Road. As noted in Table 6-2 and Table 6-3, this number of parking spaces is available in the surrounding street system.

Table 7-1: Works task proposed dates and parking changes

Task	Proposed Dates	Parking removed	Parking added
Removal of parking on Hassall St Southbound	Completed	5 Spaces	-
Site driveway Heavy Vehicle access from Hassall St	Completed	2 Spaces	-
Site Driveway Heavy Vehicle egress onto Hawkesbury Rd	Completed	4 Spaces	-
Redundant driveways on Hawkesbury Rd reinstated as kerb side parking	August 2023		2 Spaces
Redundant driveways on Bailey St reinstated as kerb side parking	August 2023		5 Spaces

#### 7.2.2 Other temporary parking removal

During the life of the project, there might be some additional need for temporary parking removal to facilitate works (e.g. geotechnical investigations, utility works, survey and general road maintenance). The potential impact and mitigation approach will be reviewed on a case-by-case basis including consideration of duration of works and impact on relevant stakeholders. Where disruption cannot be avoided, alternative parking arrangements will be investigated and implemented where feasible and practical to ensure impact is minimised. The appropriate approvals and permits will be sought from Transport for NSW and Council as described in the relevant CTMPs.

### 7.3 Managing the impacts

All of the businesses within the construction site have previously been relocated prior to the start of the Sydney Metro West demolition works. Where businesses adjacent to the construction site are still operating, GLC will take all reasonably practicable measures to maintain access to affected properties. In the event that we cannot avoid this disruption, GLC will provide alternative access and parking arrangements in consultation with those businesses affected. The provision of appropriate wayfinding will be provided prior to any disruption.

GLC will ensure that we do not block or disrupt access across pedestrian or shared user paths at any time unless alternative access is provided.

Where existing parking is removed to facilitate construction activities, consultation would occur with the relevant local council to investigate opportunities to provide alternative parking facilities, if required.

#### 7.3.1 Emergency vehicles access

There will be no impact on emergency vehicles access and access to Westmead Hospital and precinct will be maintained for the duration of the site operations works by GLC.

### 8 Workforce Parking

Workforce parking is a key issue resulting from construction activities. Reduced unoccupied street parking spaces, because of parking demand generated by the Project, can impact local residents and businesses.

It has been estimated that the workforce at Westmead will comprise of trades personnel, subcontractors and engineering, functional and administrative staff. The size of the workforce will vary across the duration of the project works. The EIS for the project provided peak construction workforce estimates. The EIS and GLC proposed peak work force numbers are provided in Table 8-1.

Table 8-1: Comparison of workforce #

EIS Peak workforce #	GLC's peak workforce #	GLC's peak site operations #
330	60	60

As shown in Table 81, the EIS estimated the peak workforce at Westmead to be considerably higher than what GLC's peak workforce has been estimated at, and therefore actual impact of workforce parking will likely be less than what was anticipated in the EIS.

The Project Minister's Conditions of Approvals requires GLC to manage workforce vehicle in order to minimise parking on public road. GLC has identified reasonable and practical mitigation measures to manage those impacts in Section 9 of this Strategy and is investigating potential alternative parking arrangements.

Most staff parking during the site operations phase of the works will be catered for either within the site and/or at a nominated offset parking area at Clyde/ Rosehill where GLC have a dedicated parking area. In addition to the above, there might be some need for occasional parking in the streets surrounding the site during day-time but those will be limited to short ad-hoc site visits of less than two hours.

In the evenings and at night-time, there might be the need to accommodate parking for up to 20 cars. The EIS estimated that about 20 car spaces would be temporarily removed along Hassall Street and Bailey Street. The latest monitoring results of car spaces at Westmead at night have shown that about 30 carpark spaces are unoccupied in surrounding streets and therefore, the impact from occupying some of those carpark spaces would be limited and consistent with the approved project. Consultation with the potentially affected residents was undertaken on the 17 and 18 May 2023. Residents were advised of the upcoming evening and night works and the need for up to 20 parking spaces to be used by the workforce. No issues or concerns were raised by the residents.

The effectiveness of the workforce parking mitigation measures implemented will keep on being monitored and reviewed on a regular basis as well as following a complaint as described in Section 11 of this Strategy.

## 9 MITIGATION MEASURES

A number of mitigation measures have been adopted by GLC including:

### 9.1 Subcontractor obligations

GLC will require subcontractors to provide employee transport strategies as part of the procurement process.

#### 9.2 Demand reduction

GLC have based all personnel not required to be located at the construction site in offices away from the work area.

#### 9.3 Tools of trade

The site will allow for secure storage areas for workers who require tools of trade.

### 9.4 Dedicated off street parking

As noted in section 7, GLC will provide off street parking for all of the site operations workforce at the Rosehill site with a bus transfer to Westmead. .

## 9.5 Staged removal

In order to mitigate parking losses through the temporary removal of parking on the local roads due to the local area works, GLC will stage the works to facilitate staged removal of parking, refer to section 7.

## 9.6 Sustainable transport options

### 9.6.1 Active transport

GLC will encourage the workforce to use active methods of transport such as walking and cycling, refer to Figure 9-1, to reduce the use of private vehicles. Bicycle parking (12#) will be provided on the construction site along with end of trip facilities such as showers and lockers.

Figure 9-1: Active transport facilities

#### 9.6.2 Public transport

GLC will encourage the workforce to use public transport through the recruitment and onboarding process, as well as through toolbox talks, to reduce the number of private vehicles travelling to and from the construction sites. .

The Westmead site is located 1minute walk from Westmead rail station, as noted on Figure 9-2

Figure 9-2: Westmead rail station walking distance

The Westmead rail station is located on the T1 and T2 line with easy interchanges at both Parramatta and Lidcombe, as noted on Figure 9-3

Figure 9-3 Westmead rail station and T1 and T2 lines

Bus stops are located on Alexandra Avenue, refer to Figure 9-4

Figure 9-4 Current bus stops

The bus stops service the following routes:

Bus route	Between		Service start and finish
660	Castlewood	Parramatta	0545-1945
661	Blacktown	Parramatta	0518-2330
662	Castle Hill	Parramatta	0530-2215
663	Rouse Hill Station	Parramatta	0600-1940
664	Rouse Hill Station	Parramatta	0540-midnight
665	Rouse Hill Station	Parramatta	0520-0200
705	Blacktown	Parramatta	0615-2300
708	Constitution Hill	Parramatta	0935-1415
711	Blacktown	Parramatta	0500-midnight
712	Westmead Children's Hospital	Parramatta	0645-1900

REVISION NO: ISSUE DATE:

G 24/07/2023 PAGE **46** OF **54** 

#### 9.7 Shuttle bus service

GLC provides a shuttle bus service between the Clyde/ Rosehill site to Parramatta where staff can catch a Sydney Trains service to Westmead. The shuttle service operates between the hours of 0520-0900 and 1520 and 1900. Over the life of the project, depending on the use, timing of the shuttle services may be modified to better suit site operations. See Appendix C for a detailed plan on the Bus operations and timings.

## 10 FLEET MANAGEMENT

Trucks to be used on the project will be compliant with NSW legislation, Sydney Metro's Principal Contractor Health and Safety Standard, relevant Australian Design Rules and vehicle standards and the Heavy Vehicle National Legislation. All heavy vehicle operations will be conducted in accordance with GLC's Chain of Responsibility (CoR) Management Plan, including monitoring of compliance with nominated haulage routes.

A combination of truck types will be used during the site operations works, with trucks being truck and dog, semi-trailers, 12.5m Single Unit trucks and low loaders. All trucks will enter and exit the site in a forward direction, where reasonable and feasible. Where there is a requirement to undertake reversing movements on the public road system, appropriate traffic control will be implemented.

### 10.1 Management strategy

Construction site traffic will be managed to minimise movements during peak periods. This will be achieved through scheduling of vehicles and staggered start and finish times. GLC will provide sufficient onsite parking for heavy vehicles. In the event that vehicles are unable to be accommodated vehicles will be directed to the Clyde/ Rosehill site as an extended marshalling facility. This will ensure that vehicles are not idling or queuing on public roads. Given the amount of space available at the Clyde/ Rosehill site, there is no requirement for further marshalling facilities.

To allow for reduced heavy vehicle movement numbers around the peak school times at Westmead Public School GLC have adjusted the heavy vehicle movement timings for the excavation to reflect Figure 10-1. This does not increase the number of truck movements across the day although it does see the movement of heavy vehicles reduced during the peak school arrival and departure times.

Figure 10-1: Proposed 30 minute heavy vehicle movements during excavation

## 10.2 Heavy vehicle routes and compliance

Generally, the heavy vehicle routes will be via arterial roads/ freeways/ tollways. Where possible the routes have considered the requirements of the Environmental Impact Statement (EIS). It is noted that the EIS for this site shows access and egress via Hawkesbury Road, refer to Figure 10-2, however, GLC will use Alexandra Avenue/ Hassall Street to gain access and egress via Hawkesbury Road. This Strategy should be read in conjunction with the Heavy Vehicle Local Road report, provided as a separate document.

Figure 10-2: EIS nominated heavy vehicle routes

## 11 MONITORING AND REPORTING

### 11.1 Monitoring

Monitoring to assess the effectiveness of this strategy will be carried out by inspections of the surrounding street system every six (6) months to ascertain the impact of our works. This monitoring would include a review of the offsite parking availability adjacent to the site for changes to the base line surveys. Where parking availability is substantially reduced, GLC will investigate further mitigation measures.

Where monitoring or community complaints identify non-conformances with this strategy corrective actions shall be undertaken through the Project's non-conformance works procedure. Corrective actions will be documented as per the procedure. Where practicable, non-conformances and corresponding corrective actions would be communicated to the workforce and reinforced through various communications including, but not limited to:

- Project toolbox and pre-start meetings
- Project alerts
- Investigation and implementation of alternative methods to reinforce the parking strategy
- Where the owner of an offending vehicle can be identified, issuing of warning notices
- Reassessment and planning of works to further minimise site vehicles on affected streets and
- Documenting actions in weekly and monthly internal reports

### 11.2 Reporting

A summary report for each half year will be provided to Cumberland Council and Department of Planning and Environment regarding the outcomes of the monitoring undertaken for the preceding half year. This report will also provide details of non-conformances and corrective actions taken.

## 11.3 Contingency measures

Contingency measures would be dependent upon the issues/ non-conformances identified during monitoring and the effectiveness of corrective actions implemented as per section 11.1.

Contingency measures would be investigated if it is determined that the corrective actions implemented are ineffective and may include"

- Investigating additional offsite parking for the workforce
- Revising site inductions and toolbox talks content to better encourage the use of active and public transport and communicate designated and prohibited locations for workforce parking
- Implementing disciplinary processes for repeated non-conformances and
- Revisiting the operations of the shuttle bus service

## 12 CONSULTATION

## 12.1 Community and Stakeholders

Various stakeholders will or have been consulted for further development of this CPAS. Stakeholder details that have been consulted are provided in Table 2 and further details can be found in Appendix B.

Table 2 Stakeholder consultation details

Stakeholder	Date	Consultation type	Issues Raised
Sydney Metro Traffic Control Group TfNSW- Customer Journey Planning	18 <sup>th</sup> August 2022	Presentation	Nil
School	18 August 2022 & refer to appendix B	Meeting presenting parking changes	No comments or issues raised on parking changes
Residents	Refer to Appendix B	various	No comments or issues raised on parking changes
GLC met with Cumberland Council	11 <sup>th</sup> Oct 2022	Meeting to go through proposed changes, design drawings and this document	Parking changes have to go to the Local Traffic Committee (see below)
Council Local Traffic Committee (LTC)	LTC meeting scheduled for 2 Nov	Present parking changes	No comments or issues raised

#### 12.1.1 Traffic and Transport Liaison Group (TTLG)

The TTLG has been established by Sydney Metro for the project, as required under MCoA D94. The TTLG consists of members from Sydney Metro, Cumberland Council and representatives from the Emergency Services. The development of this CPAS will occur in consultation with this group. The TTLG meets monthly.

#### 12.1.2 Traffic Control Group (TCG)

A TCG has been established for the project by Sydney Metro. The TCG meets fortnightly and is comprised of Sydney Metro representatives, Council representatives and other project contractors.

# GLC Community Consultation with residents in relation to parking space removal in Hassall Street and Bailey Street and intersection signalisation

Date/Time	Properties doorknocked Answered	Properties doorknocked No answer	Points of discussion
Tuesday 4 October – 3pm	12 Hassall Street Units 1, 2, 4, 5, 9, 11, 12  13-17 Bailey Street Units 1, 5, 8  8-12 Alexander Ave Units 1, 4, 5, 6  Total Answered on 4/10 = 14	12 Hassall Street Units 3, 6, 7, 8, 10, 13  13-17 Bailey Street Units 2, 3, 4, 6, 7  8-12 Alexander Ave Units 2, 3	Advised residents:     Permanent removal of car spaces on Hassall Street     Right hand turn lane into site     Construction of driveway access into site     installation of new traffic lights at the intersection of Hassall and Bailey Streets     removal of petrol tanks from the old service station.
Wednesday 5 October – 6pm	12 Hassall Street Units 3, 6, 8, 13  13-17 Bailey Street Unit 3  Total Answered on 6/10 = 5	12 Hassall Street – no answer at Units 7, 10  13-17 Bailey Street Unit 2	
Tuesday 11 October – 8:30am	12 Hassall Street Unit 7  13-17 Bailey Street Units 2, 4 8-12 Alexandra Avenue Unit 2, 3  Total Answered on 11/10 - 5	12 Hassall Street Unit 10  13-17 Bailey Street Units 6, 7	

GLC Community Consultation with residents in relation to parking space removal in Bailey Street as part of the Hassall Street and Bailey Street intersection signalisation.

Undertaken as identified as above	13-17 Bailey Street Units 1, 2, 3, 4, 5, 8	13-17 Bailey Street Units 6, 7	As above
Monday 10 October – 3:00pm	23-27 Hassall Street Units 2, 3, 4, 7  Total Answered on 10/10 – 4  23-24 Bailey Street	23-27 Hassall Street Units 1, 5, 6  23-27 Hassall Street Units 9-14 Building separate to units 1- 8. This block has been fenced off with no residents 23-24 Bailey Street	<ul> <li>Right hand turn lane into site and road reconfiguration works</li> <li>installation of new traffic lights at the intersection of Hassall and Bailey Streets requiring car parking removal</li> </ul>
GIC Community Consults	Units 1, 2, 4, 7, 9, 12, 15  Total Answered on 10/10 - 7	Units 3, 5, 6, 8, 10, 11, 13, 14	ection of Priddle Street and Hawkesbury
Road			
Tuesday 11 October – 2:00pm Commencing 11 October	117, 119, 121 Hawkesbury Road Units at 123 Hawkesbury Road Units at 26 Priddle Street (5 units) Units at 23-25 Priddle Street (13 units)		<ul> <li>Widening of pedestrian crossing at traffic lights at the intersection of Hawkesbury Road and Priddle Street.</li> <li>Associated relocation of light pole, power pole, signalisation posts and installation of pedestrian fencing (on the school side) between the signalised pedestrian travel paths.</li> </ul>
30 May 2022 July 2022 21 September	Meetings with Westmead Public School		<ul> <li>Widening of pedestrian crossing at traffic lights at the intersection of Hawkesbury Road and Priddle Street.</li> <li>General overview of construction activities and vehicle movements</li> </ul>

# C PARRAMATTA TO ROSEHILL SHUTTLE BUS

## WTP Shuttle Bus Revision 4- in effect Monday 28th Nov

As of Monday 28<sup>th</sup> November, this revised shuttle bus schedule will be implemented to ensure we continue to provide an efficient service factoring in known traffic delays. The service is being offered by the project to aid tunnel workers in getting to and from site. Tunnel workers will be given priority, with Staff able to use the bus if space is available.

The bus will run Monday to Friday in a circuit from Parramatta to all Clyde sites, with the first stop being Rosehill (Veolia Site Office) for morning Drop Offs, and MSF (Old Speedway office carpark) on evening pickups. This is to minimise the time that Rosehill workers are sitting on the shuttle.

Please note that locations and timings may be subject to change according to project requirements and traffic, however the service will never depart early to ensure people can plan their days and no one is missed. A project wide communication will be distributed prior to any changes being implemented
